

REMARKS/ARGUMENTS

The text of the originally presented claims is now amended to distinctly point out and clearly represent the subject matter of the invention. The word "alleviating" used originally in claim 1 is now replaced by the word "treating" as suggested by the examiner. With the amendment of the text of claim 5 and claims 8-9, original claims 6 and 7 are rendered redundant, and have therefore been canceled. New claim 10 has been added to describe the method of making the isoforskolin composition. Support for this claim is available in the specification.

An appropriate Terminal Disclaimer is filed herewith to overcome the nonstatutory obviousness-type double patenting rejection of claims 1-3 and claims 5-9. Claim 4 is canceled in light of the examiner's comment that there is no support in the specification for the topical use of the composition of the invention in cellulite.

Applicants respectfully request that a timely Notice of Allowance be issued in this case.

Respectfully submitted,

SABINSA CORPORATION
